University of Toronto Mississauga

What are important factors in your opinion when you choose the companies to work for in your career (pay, benefits, location, company size, etc.)?

What are the concepts/knowledge (from university) you have been using the most in your tech career? (e.g. system design)

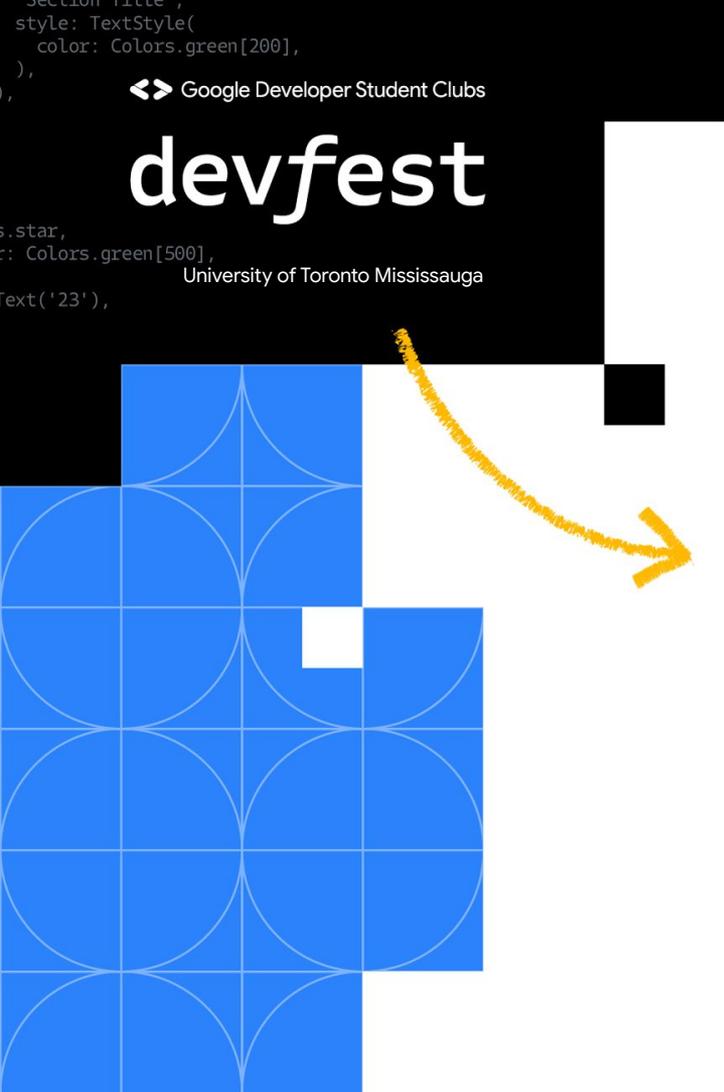

Google Developer Student Clubs

devfest

University of Toronto Mississauga

If I wanted to get into this field <X> within tech, what can I do to segue into that field?

Have you ever wondered about changing your career? How would you go about that?

Q&A with the panel speakers!
