

Personal Website

Build and Deploy in 60 Min

Benjamin Tsang

```
...org = filterByOrg ? study.lead_organization === filterByOrg : true  
...status = filterByStatus ? study.status === filterByStatus : true  
...archStatus) }
```

```
function filterStudies({ studies, filterByOrg  
...status = filterByStatus ? studies.filter(study  
...archStatus) }
```

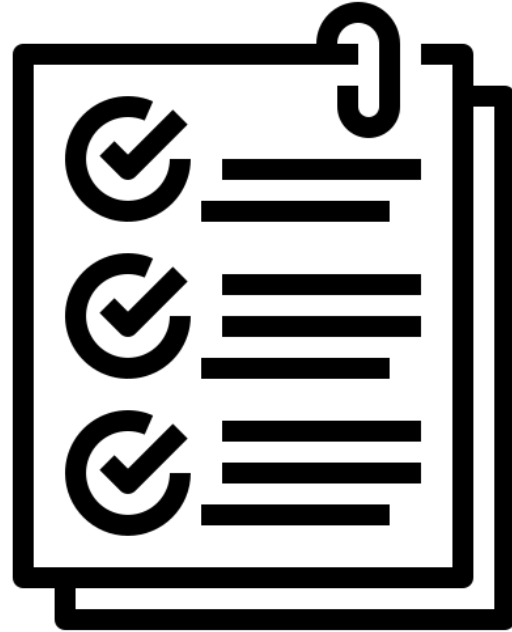

Google Developer Student Clubs

Why Build a Personal Website?

```
er(  
ll(32),  
  
/*1*/  
child: Column(  
  crossAxisAlignment: CrossAxisAlignment.  
  children: [  
    /*2*/  
    Container(  
      padding: const EdgeInsets.  
      child: const Text(  
        'Oeschinen Lake Camp  
        style: TextStyle(  
          fontWeight: FontWe  
      ),  
    ),  
  ],  
),  
),  
),  
)
```

Website checklist

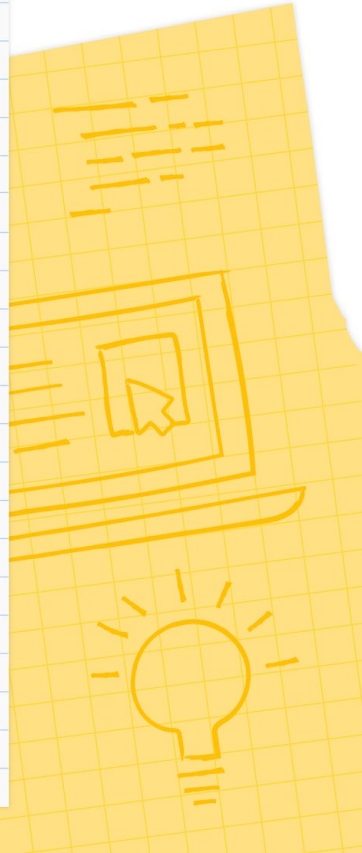

- Full CV/Resume
- Link to social media
(LinkedIn, Github, etc).
- Project details
- Photos, videos, code...
- [Good example](#)

Today's activity

Follow along

- Download template from <https://html5up.net/>
- Replace with your own content
- Host your website through [github pages](#)
- Set up [custom domain](#)
- Done!
- Optional: add [Bootstrap](#) components (suggested: [carousel](#), [hero](#), [form](#))

Thank you for attending!
